# ABOUT i-Live

**i-Live Monitoring**, a privately held company with headquarters in Delhi, India is North India's leading provider of live video monitoring solutions. We specialize in proactive and intelligent video monitoring technology that can significantly improve threat detection and police response. Our security solutions feature advanced technology, coupled with human intelligence and efficient processes, to help detect and deter crime while reducing security guard and other expenses. We are also heavily invested in the future of computer vision and artificial intelligence. We are actively developing new technologies that can enable executives with valuable business intelligence data to improve their day-to-day operations and decision-making abilities. We have live video monitoring control centers. Our team proactively monitors cameras daily, securing peace of mind for business owners.

Our clients include **Construction Sites, Shopping Centers, Apartment Buildings, Auto Dealers, Office Buildings, Industrial facilities, Distribution yards, Cannabis operations and other businesses with outdoor assets**. They range from large global enterprises to single-location companies. Our proactive solutions can help reduce external and internal theft, vandalism, property damage and provide you with actionable business intelligence. We can even reduce or replace security guards at a fraction of the cost – up to 60% savings.

# WHY i-Live

## MANAGE PROJECTS AND MARKET YOUR BUSINESS

Just one low monthly fee with no upfront equipment costs

**i-Live monitoring** Designs, installs services and Live-monitors Security Solutions. Commercial and Residential property managers have an obligation to maintain a safe environment and keep tenants and visitors free from injuries and dangerous conditions. Traditionally, many have sought out a security guard service to help protect their properties, but there are risks involved in relying on security guards as your sole solution including.

There are no federal training standards. Some guards form relationships with the people they are hired to protect. That could hinder objectivity. In some cases, a guard may act inappropriately or unnecessarily escalate a situation. There is risk involved in being a guard because of dangerous situations. The inability to be in multiple places at the same time. Wages, insurance, training fees, uniforms and equipment can make security guards cost-prohibitive.

Learn more about these risks and why security guards are an outdated, inefficient and a cost-prohibitive security solution in our white paper, Changing of the Guard. You'll also find out how today's computer-vision technology has disrupted the security guard industry with more efficient, effective and less expensive solutions.

There is very little security guards can do that proactive video monitoring cannot. Live video monitoring combines technology with human intelligence to provide ongoing surveillance without the liability problems of a traditional guard. Trained operators remotely watch multiple on-site security cameras simultaneously. Traditional guards are limited in what they can see, and larger properties may be challenging to cover. Remote video monitoring allows our operators to watch areas that may be inaccessible to guards.

Proactive video monitoring provides extensive site coverage, round-the-clock surveillance and cost savings for a more thorough and reliable level of protection than traditional guards.

# KEY BENEFITS

MANAGE PROJECTS AND MARKET YOUR BUSINESS

## KEY BENEFITS OF VIDEO MONITORING INCLUDES

i-live monitoring capabilities cover North India, so we can protect your assets no matter where your business is. We provide tailored solutions for large national companies, as well as small and mid-sized enterprises. Our trained operators watching for suspicious behaviour in real time. Our technology allows for simultaneous views at any time.

### SAVE UP TO 25-60% ON SECURITY AND GUARD EXPENSES

Monitored security cameras offer a better, more thorough and reliable level of protection than human guards at a fraction of the cost and with less liability.

### TOTAL SERVICE

## A COMPLETE SECURITY SOLUTION FOR SUPERIOR PROPERTY PROTECTION AND SAVINGS

iLive Monitoring backs its powerful live monitoring and top-quality IP cameras and network with a multi-level Total Service offering. In addition to monitoring your property, we also monitor your entire surveillance data network, including cameras and DVRs. We can take immediate action when we see a property threat or detect a network problem.

**Customer Service:** iLive's proprietary camera statistics software constantly checks cameras and equipment to ensure they're working and operating correctly. It can detect problems related to power, internet, wireless, and camera outages.

**Control Center Support:** Trained operators watch cameras and evaluate activity. They can identify when systems are down and perform basic troubleshooting 24/7.

**Advanced Customer Support:** iLive analysts conduct video research, study significant video analytic data and respond to customer investigation requests. Our technical support team is on call 24 hours a day to respond to customer emergencies.

### Detect

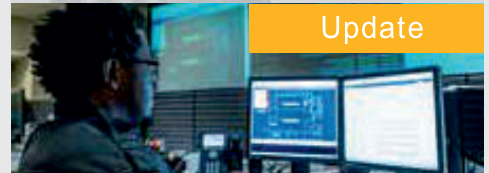

Trained operators can detect unusual activity on your property.

### Respond

Operators can send audio warnings to on-site speakers and call police.

### Update

Property owners and managers are notified when there is a property incident or technical issue.
